# Important Screw Identification Information

■ FES has been a refrigeration packager of Kobelco compressors since 1980 using them in their L-C, H-E, and L Series packages.

■ The L-C Series and L Series compressors are used mainly in 25 - 200 horsepower refrigeration packages - FES Model L Series: 70L, 90L, 132L, 160L (Kobelco GB Series)

■ The H-E Series compressors were used mainly in 140 - 2000 horsepower refrigeration packages (Kobelco NB Series)

■ If you are not sure if you have a Kobelco compressor, call us with name plate information and series.

■ Kobelco has the machines, testing equipment and expertise to get your compressor running again.

■ Expertise in the original machining and assembly of your compressor, helps insure longer and smoother operation.

## Stocked components for timely turnaround.

## The remanufacture of any compressor includes the following:

1. Replacement of all bearings, gaskets, and mechanical seals
2. All parts will be factory original
3. Restoring bearing seats and bores to original dimensions
4. Dynamic balancing of rotors
5. Factory tested after assembly
6. Repair or replacement of rotors and housings when needed
7. *Call or e-mail for cost estimate*
